

PRODUCT DESCRIPTION

Simple and elegant LED surface mounts in archetypal shapes can be used on walls as lighted mirrors or blend seamlessly as a coordinating detail of a bathroom mirror providing enough light output to effectively illuminate a vanity space. Considering a different approach to this concept, these LED surface mounts are also produced with a warmer, Bronze tinted mirror adding an element of moodiness and drama to the reflective surface. The result is a transformation of the overall ambience that opens the design up to additional install applications.
